

**Model** : ATZ US241H  
**Description:** USB 2.0 4 Sharing 4-Port Hub

Intelligent USB 2.0 data Switch allows two or four computers to share USB 2.0 4 port hub .Only one computer can access USB2.0 devices each time. Normally, most of computers have been built-in 2 to 4 USB 2.0 down stream ports and each computer can easily has its own individual USB devices. But, it cost a lot of money on USB devices and the users might need to share each other personal USB device without going through hot plug process.

**Features:**

- Four Computers share USB 2.0 4 port hub.
- Supports USB bus & self power mode
- USB 2.0 & 1.1 Compliant
- Windows 98 SE / ME / 2000 / XP / VISTA / 7 / 8 and Mac OS 8.6 and higher compatible
- Using push button, hot Key to switch USB device port between IBM PCs and easy operation
- Using push button to switch USB device port between Mac systems and easy operation

**Model** : ATZ US241H  
**Description:** USB 2.0 4 Sharing 4-Port Hub

## Specifications:

Model No.	ATZ US241H	
Speed	480 / 12 / 1.5 Mbps	
LED	4	
PC Selection	Push Button / Hot Key	
Compliant	USB Spec. 2.0 / 1.1	
Power Mode	Bus & Self Power (5V DC 2A)	
Connector	Upstream	USB B Female x 4
	Downstream	USB A Female X 4
Housing	Plastic	
Dimension (L X W X H )	95 x 69 x 26 mm	

## Quick Installation Guide:

- (1) 4 computers connect via 4 USB 2.0 cables (B male) to the ports of unit.
- (2) 4 USB devices connect via 4 USB 2.0 cables (A male) to the hubs of unit.
- (3) Press the push button, the unit will switch computer from port A to port B. Press the push button again, the unit will switch computer from port B to port C...and so on.
- (4) Or press hot-key [Scroll Lock] twice from the computer you are using, you may use the all 4 connected devices directly. Ex: if you are operating port A computer, please press [Scroll Lock] twice. And you may share the 4 devices from computer A accordingly.

Note: The sharing hub is for splitting 4 devices. It is not able to switch devices.
